Extra-Credit Opportunity! – For a MAXIMUM of 10 points added to your first exam, you can make a video that teaches a specific topic in biology. To get your topic, you must email me by TODAY (10 pm) and I will reply with your assigned topic (I pick, you do not!).

Your grade will be judged by the following:

1) Accuracy
2) How well it teaches your assigned topic
3) Covers the topic in the detail in which is was presented in class (not more, not less)
4) How interesting it is
5) How well the video was made

Each of the 5 criteria is worth 2 points (for a maximum of 10).

The assignment is due on TUESDAY of next week. You must post your video on youtube AND you must email me the link AND the actual video file (or you may burn it to a CD and give it to me in that format (do not just show up with a flash drive). The video is due by 10:30 AM on TUESDAY and no late assignments will be accepted!

Your video is worth a maximum of 10 points (to get 10 points), it has to be PERFECT. I expect most people will get 5-7 points.

The maximum the video can raise your grade is to a 95% (ie, you cannot get a 90 on the exam and do the extra-credit to get yourself up to 100%).

Remember, you must email me (trevell@mtsac.edu) so I can assign you a topic (you cannot just pick your own).

You can work with each other, but, each student must make their own video (no group projects). You can also get help with the video making aspect, but, you must provide the biological input.
