

Hi Stanley,

How are you? I hope great! I was just emailing to say hello and let you know how I'm doing. I'm still working at the animal hospital which I love so much! Working there inspires and motivates me to keep working on my goal of becoming a licensed veterinarian. Currently I'm taking Chem40, Bio2, and Math130. Those classes are kicking my butt! But I know I'm not the first taking these classes so I know it's possible to take them and pass them. I also wanted to say thank you for the material you covered in our counseling class. Though most of the stuff I already knew, there were new things I'm glad you taught me! Well hope to hear from you soon, and I might be stopping by soon for an appointment.

Sincerely,
Yesenia D.
